Nigerian Cancels-by-Office Full List part 1: Aba to Kurmin Biri

- **Office name:** And further brief details of the offices named in these lists are given in Nigeria Post Offices List. Magenta text shows an office not listed in either Jones or Proud. The number in brackets (XXX) after some office names refers to the Post Office Identification Number, which may appear on some cancels from that office.
- **Jones / Proud:** Are shorthand references to, respectively, the '*The cancellations and postmarks of Nigeria 1914-80 Edition 2*' by Neville Jones and '*The Postal History of Nigeria*' by Edward Proud
- **Proud type:** No entry signifies that the cancel concerned is not detailed in Proud. Magenta text shows a cancel variation not noted in Proud
- **Jones type:** As published in the **Jones Type Description list** and the **New Jones Type Description list.** No entry signifies no published Jones type. Magenta text shows a cancel not noted in Jones.
- **Comment:** Additional information about the cancel which may help identification. Ctr no: refers to a number shown on some cancels which identifies the post office counter at which the canceller was used. Words in CAPITALS are as shown on the cancellation itself. 'top' means words are at the top of the cancel, and which run clockwise (cw). 'At foot' means bottom of cancel running counter-clockwise (ccw). Other word arrangements are described in terms of 'X o'c' – clock-face position of the start of the words. Use of '/' generally denotes 'next text starts on a new line'. ? indicates uncertainty – not the character itself
- **Earliest / Latest known dates:** Referred to in comments as Ekd, Lkd. Dates given are the most recent available, and are shown as they appear on the cancel (where known). Dates in black come from Jones (or if suffixed ^{P}, from Proud). Dates in magenta come from the author's collection or from other collectors. A date *in italics* shows that the year has been estimated from the date of issue of the cancelled stamp. Dates and text highlighted in blue show change from the previous version of this list.

Nigerian Cancels-by-Office Full List part 2: Kurmin Biri Kaduna to end

- **Office name:** And further brief details of the offices named in these lists are given in Nigeria Post Offices List. Magenta text shows an office not listed in either Jones or Proud. The number in brackets (XXX) after some office names refers to the Post Office Identification Number, which may appear on some cancels from that office.
- **Jones / Proud:** Are shorthand references to, respectively, the '*The cancellations and postmarks of Nigeria 1914-80 Edition 2*' by Neville Jones and '*The Postal History of Nigeria*' by Edward Proud
- **Proud type:** No entry signifies that the cancel concerned is not detailed in Proud. Magenta text shows a cancel variation not noted in Proud
- **Jones type:** As published in the **Jones Type Description list** and the **New Jones Type Description list.** No entry signifies no published Jones type. Magenta text shows a cancel not noted in Jones.
- **Comment:** Additional information about the cancel which may help identification. Ctr no: refers to a number shown on some cancels which identifies the post office counter at which the canceller was used. Words in CAPITALS are as shown on the cancellation itself. 'top' means words are at the top of the cancel, and which run clockwise (cw). 'At foot' means bottom of cancel running counter-clockwise (ccw). Other word arrangements are described in terms of 'X o'c' – clock-face position of the start of the words. Use of '/' generally denotes 'next text starts on a new line'. ? indicates uncertainty – not the character itself
- **Earliest / Latest known dates:** Referred to in comments as Ekd, Lkd. Dates given are the most recent available, and are shown as they appear on the cancel (where known). Dates in black come from Jones (or if suffixed [P], from Proud). Dates in magenta come from the author's collection or from other collectors. A date *in italics* shows that the year has been estimated from the date of issue of the cancelled stamp. Dates and text highlighted in blue shows change from the previous version of this list (November 2023)

	R21	JR5 / JR8 JR22	Difficult to distinguish these 11 Proud types, though the early egs are wider, (28mm), and later type only 27mm or so. Worn and blurry cancels make confident distinctions impossible. Jones' categorisation into two types seems a more practical way to make sense of these cancels. JR5 at 29mm diameter and JR8 at 28mm. JR8 S in LAGOS larger. Dates given are for the JR types. Egs seen include two with 26.5mm diam. Remeasured and divided into 4 subgroups by cancel width: 29mm, 28mm, 27mm and under 27mm. And there are differences in letter shapes, esp S of LAGOS. Complex! Though listed separately below JR22 is almost certainly a heavily worn example of this group of cancels which has lost its side dots

	IS-S R14B	R10	JSR3 No code letter. Flanking dots (which may be very faint). As the variety of Proud types suggest, there were several cancellers in operation. Having measured 27 egs of whole cancels, all are c. 26mm 'tall', width of REGISTERED is c.22mm; width of text at foot is c 29mm. The one dimension which is variable is width, from 31mm to just under 33mm, with mean value 32mm. However, there is no clear difference by diameter in usage dates, so while the pre-1914s seem separate in time (though not in size), the post 1914 dates are not further separated here.
